Kestrel Retail Group: Data Governance Policy

POL-01 | Version 3.0 | Effective 2025-01-01 | Owner: Head of Data Governance

1. Purpose

This policy sets how Kestrel Retail Group defines, owns and certifies the data and KPIs used for decisions.

2. Scope

All KPIs, dashboards and source tables listed in the data catalog, in every channel (stores, app and web).

3. Roles

The KPI Council, chaired by the Head of Data Governance, approves certification and major changes. Each KPI and data asset has one accountable owner, a domain head named in the data catalog. Data stewards check definitions and data quality.

4. Certification levels

Certified: approved by the KPI Council and safe for board reporting. **Provisional:** in use but not yet approved; must be labelled on dashboards and must not be used in board packs. **Deprecated:** replaced by a newer version; must not be used for any reporting.

5. Principles

There is one certified definition per KPI. Informal definitions in team notes, slides or FAQs have no standing; when they conflict with a Certified KPI definition, the Certified definition applies.

6. Compliance

Breaches are reported to the Head of Data Governance. Procedures supporting this policy are SOP-01 to SOP-08.
