Kestrel Retail Group: Data Classification Standard

POL-03 | Version 2.0 | Effective 2025-05-01 | Owner: Head of Data Governance

1. Purpose

This standard defines the four data classification levels and how each must be handled.

2. Classification levels

Level	Description	Examples	Handling
Public	Approved for release outside Kestrel.	Published store locations, press releases.	No restrictions.
Internal	For employees only; low harm if disclosed.	Dashboards with aggregated KPIs, SOPs.	Line manager approval for access.
Confidential	Harm to customers or Kestrel if disclosed.	customers table, invoices, unreleased results.	Data owner approval; no public AI tools.
Restricted	Serious harm or legal breach if disclosed.	Payment data, staff health records.	Head of Data Governance approval; 90-day access.

3. Default level

Any data asset without a classification is treated as Confidential until it is classified.
